F-EM-16PS	Pediatric FSI Disposable Backboard, w. 4 straps - box of 5
F-EM-16PA	Pediatric FSI Disposable Backboard, w. 4 straps & Head Immobilizer - box of 5

Advantages of FSI® Transporter® Disposable Backboards include:

- ◆ They come packaged in boxes of 5 and take up little space since they store flat. (Adult packaging of 5 boards = 81" L x 28" W x 6" H)
- ◆ When needed simply pull the zip tabs on the back of the boards and in less than 30 seconds a fully configured backboard is in place and ready to go to work. There is no glue or tape to dry out and fail over time.
- ◆ The special Michel-man X300 coated structural cardboard can be left out in the soaking rain overnight and yet the adult board can still hold 520+ pounds (236+ kg). The pediatric board is 150lbs. (68kg) rated.
- ◆ Cardboard, relative to plastic type boards, is a far more biodegradable substance over time.
- ◆ FSI® Transporter® Fluid Resistant Disposable Adult and Pediatric Backboards are significantly lower in costs than all other backboards. In the event of a true mass casualty incident in which literally hundred's or even thousands of victims may require stretcher borne attention it becomes readily apparent permanent backboards that are in limited supply in most areas will simply not be able to handle the emergency.

\* Named one of the Top 10 new products at the 2006 Annual EMS Congress Trade Show.
